**AUTHORIZING OF COMMUNITY WORKFORCE AGREEMENT APPROVED:
RESOLUTION 2015-95**

It was moved by Paul Worley and seconded by Brian Baldrige to approve the following Community Workforce Agreement and Promoting Our Local Workforce:

Whereas, throughout the United States, private and public construction users have regularly utilized and required community workforce agreements to establish uniform terms and conditions of employment for contractors and craft construction employees; and, community workforce agreements have been shown to provide an effective mechanism for overall construction project staffing, planning and labor stability on job sites; and

Whereas, uniformity of terms and conditions and efficient administration of public works is especially needed given the current levels of unemployment generally, and more profoundly in the construction industry; and

Whereas, the County has determined that the continued growth and health of the construction industry in Adams County is vital to the growth and stability of the general economy of Adams County; and

Whereas, community workforce agreements are legal under federal and Ohio law, have been successfully utilized on a large number of major public improvement projects throughout the United States, and neither union nor non-union contractors and employees are precluded from competitively bidding or working under community workforce agreements.

Now, therefore, be it resolved, by the Adams County Commissioners that the following provisions be enforced under a community workforce agreement:

- 1) In connection with the public bidding and contract awarding process for every proposed public contract or construction project, the Adams County Commissioners and the department coordinating the bid, shall evaluate whether a community workforce agreement will advance the County's interest in cost, efficiency, and quality while promoting labor-management stability as well as compliance with applicable legal requirements governing safety and health, equal employment opportunity, labor and employment standards, and other related matters.
- 2) If the Adams County Commissioners and the department coordinating the bid determine that a community workforce agreement will serve the goals set forth above, the Adams County Commissioners, shall negotiate a community workforce agreement with the successful bidder.
- 3) The associated bidding documents for each such procurement or construction project shall contain a written provision requiring the successful bidder negotiate, comply and adhere to all provisions of a community workforce agreement by the Adams County Commissioners for the project.
- 4) The County shall not thereafter enter into any contract with the successful bidder, their contractors or sub-contractors, for the procurement or construction work being bid unless the contract contains a provision requiring the successful bidder, and all of the bidder's contractors and subcontractors, to comply with and adhere to the provisions of the negotiated community workforce agreement.

All bid invitations and specifications for procurement, construction, repair and renovation work shall advise prospective bidders of all the factors that will be taken into consideration by the Adams County Commissioners in determining whether a bid is not only the lowest but the "best" bid. The factors being taken into consideration shall be established to identify those provisions, which may be required to conform to this resolution including a form or forms to enable a bidder to provide evidence to the County of the bidder's compliance with, adherence to, or satisfaction of, the various factors that shall be considered by the Adams County Commissioners in determining the lowest and best bid.
